### 2. What size tent should I rent for my event?

Tent Sizing depends on two major factors: 1) Number of guests 2) Purpose of tent for your event. In wedding events and similar events, guests will hold most of the reception and/or ceremony under the tent. Therefore, the dance floor the ceremony chairs and dj booth as well as sitting tables and buffet tables, gift tables and the sweet-heart table must all fit under the tent. In all inclusive events such as these, 20 ft per person is standard in determining tent size. Events where only the sitting tables are placed under the tent, around 7-10 ft per person should suffice. In any situation it is always good to call one of our consultants, who will sit down with you and ensure that you get the correct size tent for your event.

**4. How many Patio Heaters will I need for my Event?**

Each heater warms approximately a 15 foot circle. If you are putting them on a patio, simply tell us the size & we'll make a recommendation as to how many would work best. If you are putting them out on a lawn, explain the layout the best you can & we'll go from there.

What if it's breezy, do they still work?

YES! Patio Heaters put out an infra-red heat which is not drastically effected by breezy conditions. If the wind exceeds 30mph the heaters will have a hard time staying lit, and will not be very effective.

**5. Do I need a permit for my event?**

Yes! Almost every municipality or state requires permits if. Permit requirements vary depending on the size of the tent or location. Even if you are not renting a tent a permit may be required. Every Town building department has different requirements and it is best to check with them. Charges also vary per town. Customer is responsible for obtaining all permits. All of our tents meet flame retardant requirements.
